

## Spring Discussion Meeting of the Soft Condensed Matter Group

*3 de Junio de 2013 a las 10:00*

*Sala de conferencias del CFMAC, C/Serrano 121*

| Speaker       |                  | Título                                                                                                     |
|---------------|------------------|------------------------------------------------------------------------------------------------------------|
| 10:00 a 10:30 | <b>Nacho</b>     | Spatial dependence of the structural order of LIPSS in polymer thin films within the laser spot            |
| 10:30 a 11:00 | <b>Mari Cruz</b> | Order and chain alignment in 1D nanopillars of conjugated polymers                                         |
| 11:00 a 11:30 | <b>Tiberio</b>   | On the Application of GISAXS (Grazing Incidence Small Angle X-ray Scattering) to Nanotechnology            |
| 11:30 a 12:00 |                  | CAFÉ                                                                                                       |
| 12:00 a 12:30 | <b>Daniel</b>    | Estudio de micropalancas de Si cargadas con polímero (PPAz) mediante GIWAXS                                |
| 12:30 a 13:00 | <b>Dani</b>      | Estudio de la dinámica en copolímeros ferroeléctricos bajo confinamiento                                   |
| 13:00 a 13:30 | <b>Alex</b>      | Changes in mobility of plastic crystal ethanol during its transformation into the monoclinic crystal state |
| 15:30 a 16:00 | <b>Michela</b>   | Medidas mecánicas en la nanoescala                                                                         |
