10:00-10:30	Aurora Nogales <sup>1</sup>	Breath figures of P3HT and of its photovoltaic blend with PC71BM
10:30-11:00	Juan Rodriguez <sup>4</sup>	Preparation of porous surfaces using the technique of Breath Figures and applications
11:00-11:30	Albert Cirera <sup>2</sup>	Deposit by electrospray of carbonaceous materials, characteristics and properties
<i>COFFEE BREAK</i>		
12:00-12:15	Edgar Gutiérrez <sup>1</sup>	Ink-jet of functional polymer nanoparticles: preparation and AFM study
12:15-12:45	Rebeca Hernández <sup>4</sup>	Spray deposition of polymers from natural resources to produce materials for biomedical applications.
12:45-13:15	Isabel Rodríguez <sup>5</sup>	Harder superhydrofobic soft surfaces
13:15-13:45	Esther Rebollar <sup>3</sup>	LIPSS formation on polymers containing expanded graphite and carbon nanotubes
13:45-14:00	Izabela Irska <sup>6</sup>	Dielectric properties of novel aliphatic-aromatic block copolymers.
14:00-14:30	Álvaro Rodríguez <sup>1</sup>	Applications of Soft X-ray in polymer materials
<i>LUNCH @ IEM</i>
